RE: Application for Velocity Software Engineer Internship Summer 2026

Dear Scotiabank Velocity Hiring Team,

I am a Computer Engineering co-op student at Toronto Metropolitan University and I am applying for the Summer 2026 Velocity Software Engineer Internship in Toronto. I am available full time from May through August and I am eager to contribute on a squad that values learning, ownership, and opportunity.

I build reliable software with modern stacks. At Momentum AI I developed and maintained Flask APIs that power an AI study platform, designed data pipelines with PostgreSQL and Supabase Vector DBs, and added request orchestration and rate limiting to keep high-volume features stable. My day to day included branching and pull requests in Git, reviews, and staged deployments, which aligns with your focus on clean delivery and strong SDLC practices.

I also led a seven-engineer team at Echolabs to deliver a production-ready MVP in six weeks that placed third in an accelerator. I designed FastAPI and Node.js services, set up CI and automated testing, and guided code reviews and system design for performance and modularity. That experience taught me how to turn rough concepts into working software, write specs others can use, and keep standards high while moving fast.

My technical foundation fits the role. I work in Python, JavaScript, React, C, and C++. I use PostgreSQL and have deployed services on AWS. I am comfortable with Agile rituals, unit testing, and integration testing, and I enjoy producing small prototypes to validate ideas before we scale them. In a robotics role, I built real-time, event-driven systems with multithreading, TCP, and WebSocket streaming, which sharpened my debugging and systems thinking under real constraints.

Beyond projects, I invest in people and culture. I mentor peers at hackathons and workshops, and I communicate clearly in design discussions and retros. I will bring the same attitude, ownership, and curiosity that your program looks for, and I am excited by the chance to learn across Scotiabank and Tangerine.

Thank you for your time. I am ready to complete the application steps and would welcome a chance to discuss how I can add value to the Velocity team this summer.

Sincerely,
Syed Kaab Surkhi
